Speaking at Jonesborough.

Last Wednesday was a bright and beautiful day; not a cloud obscured the heavens, and nature smiled in all her loveliness and beauty. But in order to effect this desirable object there out be a general agreement among European potentates to be satisfied with things as they are. They must be willing to renounce all projects of ambition, and resolve to be contended with the greatness which is only to be assured by the pursuits of peace. And therein lies the difficulty. At present France and Pruesia menace the peace of the continent, because they are continually increasing their armies, and procuring the newest and most effective patterns of arms.

We have been asked by several persons within the last few days, if we do not suppose that the Federal Government will pay the Southern people for their property. The impression is being made on the minds of nany, we learn, that if certain men can he dected they can get the Government to pay the Southern people for their lost property. This they say would reconcile the people of the South to the people of the North. Deigning politicians may tell this story to the ople it order to obtain their votes, but it is a false assumption. Who will pay them?-Fax the negroes to pay their old masters!-Never, Never! Tax the North to pay the leading rebels of the South for four long years of civil war? Tax the loyal people of the country to pay men for trying to destroy the Government of their country? For filling he land with widows and orphans?
